

# Lecture Overview: Getting Started With Basics

---

## In this lecture, you will learn -

- History of the world wide web.
- What is Client-Server Architecture?
- What are the front end and back end of the website?
- What happens when you visit a website?

## At the end of this lecture -

- You will get familiar with various terms related to web development.
- You will be able to differentiate between static and dynamic websites.

## To make the best use of this lecture, we advise you to keep the following points in mind -

**Take Notes:** While you are watching a video, it is always good to have a pen and paper to take note of all the important concepts covered in the video. It will help you in remembering those concepts better.

**Try it yourself:** After watching the video try to practice the same; if you get stuck, watch it again.

**Additional Resources:** We have covered all the important concepts through videos and notes, but it is always better to explore some additional resources available online. We have compiled some resources for your reference, though it is not necessary but if you are interested to learn more about a specific topic, you may explore them.
